

We are residents of Indiana, a state that already has a strong "do not call" law. It is my understanding your proposal may weaken this law. While we are glad you are attempting to help people in other states, please allow states with existing stringent laws to keep them in effect. The Indiana law has helped tremendously by preventing people from invading our right to privacy. We often would get at least two calls a day, now we get none. Privacy is a basic right, please help us keep it and not weaken Indiana law. It is working great just the way it is. Thank you.
